Job title: Software Developer for TMS**Job description:** In this position you support our IT team with the development of our individual Transport Management System (TMS) - as a permanent team member or as a long term freelancer. Furthermore, you are responsible for the conception and management of relational data bases. You will create profound requirement analyses. Considering the latest technologies and methods, you then will develop suitable, tailored technical solutions and add-ons for our Transport Management System. After the introduction of new solutions, you are responsible for the testing and the quality assurance and offer second level support to our internal employees.**Your strengths and qualifications:****YOUR STRENGTHS**

- You like to develop, test and launch creative software solutions.
- Your working style is structured and you fulfil your tasks in an independent, self motivated and goal oriented way.
- You like to be part of a young, dynamic, multicultural team.

YOUR QUALIFICATIONS

- You have good programming skills, ideally in Progress OpenEdge or in similar database oriented programming languages.
- You have already gained experience in object oriented development.
- You have a good understanding of economical processes.
- You have very good analysis capabilities.
- You have good skills in German and English.

Our offer:

We offer an attractive salary, extended practice-oriented training in an international field that lasts several months, and an informal, multi-national atmosphere to work in.
